Acknowledgement

This webinar was made possible in part by Cooperative Agreement Numbers UG7MC28482 and UG7MC31831 from the US Department of Health and Human Services (HHS), Health Resources and Services Administration (HRSA), Maternal and Child Health Bureau (MCHB) as part of an award totaling \$1,099,997 annually with 0 percent financed with non-governmental sources. Its contents are solely the responsibility of the authors and should not be construed as the official position or policy of, nor should any endorsements be inferred by HRSA, HHS or the U.S. Government.

Housekeeping Notes

- **Webinar is being recorded and will be available within 2 weeks on our website: www.ncfrp.org**
- All attendees will be muted and in listen only mode
- Questions can be typed into the “Questions and Answer” (Q & A) box at the bottom pane of the webinar
- Due to the large number of attendees, we may not be able to get to all questions in the time allotted
 - All unanswered questions will be posted with answers on the NCFRP website

Webinar Evaluation

- At the end of today's webinar, we encourage you to take a brief survey on how we did. Please take a moment and provide us with your feedback. It helps us to plan future webinar offerings!

About the National Center

- The National Center for Fatality Review and Prevention (NCFRP) is a resource and data center that supports child death review (CDR) and fetal and infant mortality review (FIMR) programs around the country.
- Supported with funding from the Maternal and Child Health Bureau at the Health Resources and Services Administration, the Center aligns with several MCHB priorities and performance and outcome measures such as:
 - Healthy pregnancy
 - Child and infant mortality
 - Injury prevention
 - Safe sleep

HRSA's Overall Vision for NCFRP

- Through delivery of data, training, and technical support, NCFRP will assist state and community programs in:
 - Understanding how CDR and FIMR reviews can be used to address issues related to adverse maternal, infant, child, and adolescent outcomes
 - Improving the quality and effectiveness of CDR/FIMR processes
 - Increasing the availability and use of data to inform prevention efforts and for national dissemination
- Ultimate Goal:
 - Improving systems of care and outcomes for mothers, infants, children, and families

Presentation goals

- Understand new features of the National Fatality Review-Case Reporting System (NFR-CRS) released in Version 5.1
- Understand available technical assistance from the National Center staff

Speakers: National Center staff

Purpose of the system

To systematically collect, analyze and report comprehensive fatality review data on the death of each child:

- Infant, child, family, supervisor and person responsible information
- Investigation actions (including autopsy information)
- Services needed, provided or referred
- Risk factors by cause of death
- Recommendations for, and actions taken, to prevent deaths
- Factors affecting the quality of case review

NFR-CRS features

- Web-based system housed at MPHI Data Center
- Easy to use
- Comprehensive; prevention-focused
- Enter, search, print, download data, and create standardized reports
- Extensive support
 - Meet regularly with programming staff
 - Transaction tracking
 - National Center maintains help desk (email, telephone)
 - Training site available to all users
 - Maintain a wish list of any user recommendations
- Data Use Agreement required to participate
- FREE!!

Section L and Prevention outcomes

Section L - Findings

- Document findings
- Identify preventability
- Identify any programs/policies that are in place that might impact the death

Section L: Findings Identified during the Review

Mark this case to edit/add findings at a later date 

1. Describe any significant challenges faced by the child, the family, the systems with which they interacted, or the response to the incident. These could be related to demographics, overt or inadvertent actions, the way systems functioned, or other environmental characteristics (See Data Dictionary for examples). 

* No doll scene re-enactment was conducted by local authorities

* Caregiver was unable to pay for electricity and was using an extension cord hooked to neighbor to provide for some power

2. Describe any notable positive elements in this case. They could be demographic, behavioral, or environmental characteristics that may have promoted resiliency in the child or family, the systems with which they interacted or the response to the incident (See Data Dictionary for examples). 

* Pregnant teenage mom was regularly attending perinatal support group

* Bereavement support was immediately offered and utilized by family

3. List any recommendations and/or initiatives that could be implemented to prevent deaths from similar causes or circumstances in the future: 

* Death scene investigation training (including doll scene re-enactment training) will be offered to all local law enforcement and coroner investigators in summer 2020; training is being provided by state Department of Health.

4. Were new or revised agency services, policies or practices recommended or implemented as a result of the review?  Deselect answer

☐ Yes

☒ No

☐ Unknown

5. Could the death have been prevented? 

☒ Yes, probably

☐ No, probably not

☐ Team could not determine

Response to COVID-19

- Revised NFR-CRS to include COVID-19 as a cause of death
- Created guidance for teams on conducting virtual meeting and high volume reviews
- Created guidance on reviewing **direct and indirect** COVID-19 deaths
- Compiled self-assessment tools
- Participated in national dialogue with key partners

Upcoming Resources: Training Modules

- NFR-CRS Version 5.1
- Grief and Bereavement
- Findings
- Data entry for local teams (anticipated June 2020)

Upcoming Resources: Written Guidances

- Reviewing deaths related to COVID-19
- Creating and documenting findings
- Engaging AI/AN populations in fatality review
- Revised parental interview
- Best practices in suicide reviews
- Revised CDR program manual

May 2020
